

Order Module

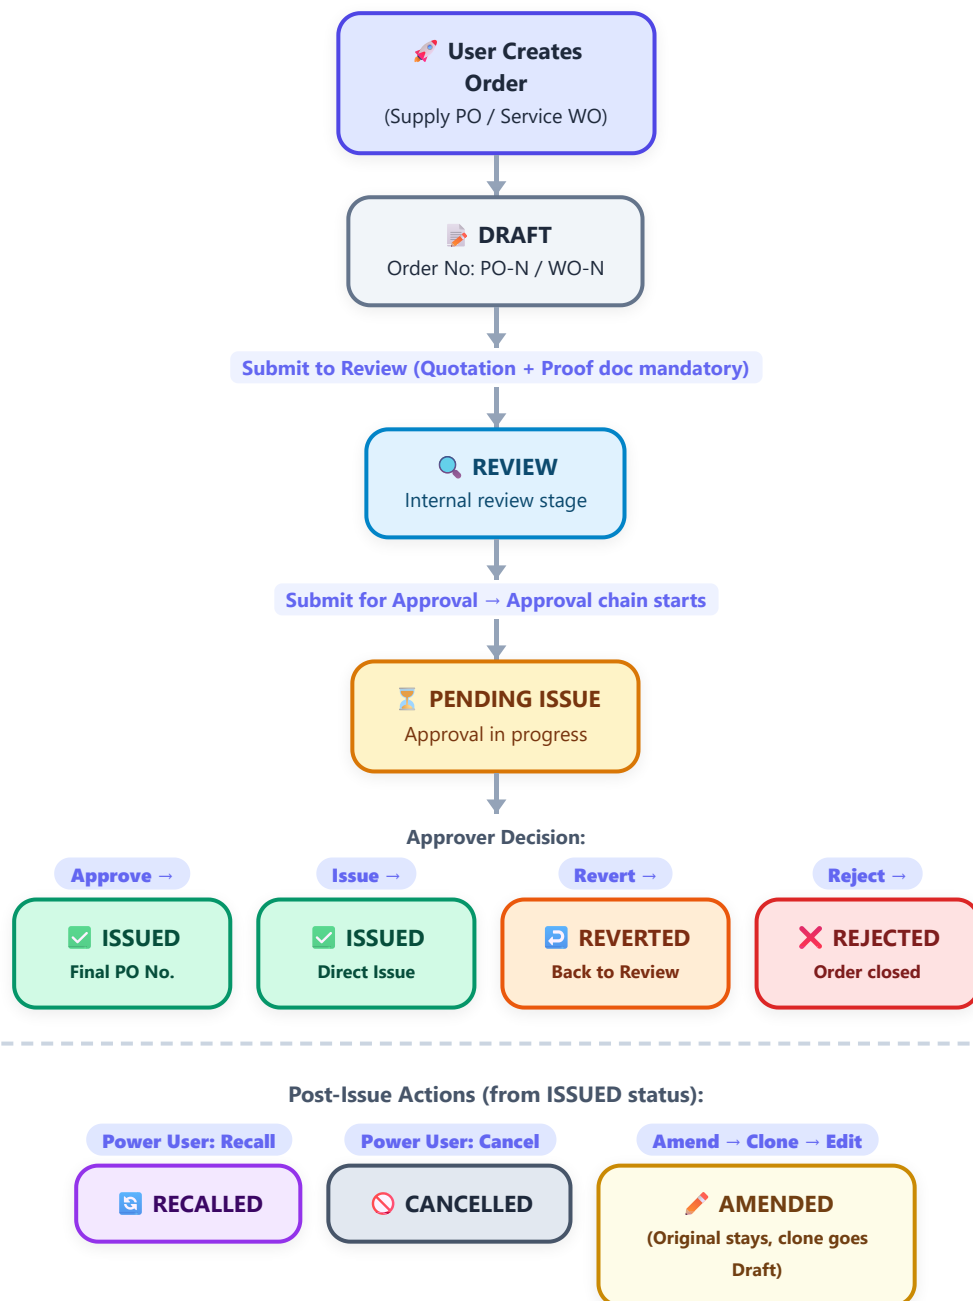

Complete Flowchart & Documentation

Purchase Orders (PO) & Work Orders (WO)

Generated: 6 May 2026

1. Order Lifecycle — Status Flow

Order module mein do types hote hain: **Supply Order (PO)** aur **Work/Service Order (WO)**. Dono ka lifecycle same hai — Draft se start ho ke Issued tak jaata hai, beech mein approval chain hoti hai.

2. Status Descriptions & Color Codes

 Draft	 Review	 Pending Issue	 Issued ✓	 Rejected	 Reverted
 Recalled	 Cancelled	 Amended			

Status	Matlab (Meaning)	Kya Kar Sakte Ho
Draft	Naya order bana, abhi save hai. Temporary number (PO-1, WO-3) mila.	Edit karo, Submit to Review karo, ya Delete
Review	Internal review ke liye submit kiya. Documents check ho rahe hain.	Submit for Approval (approval chain start), ya wapas Edit
Pending Issue	Approval chain mein hai. Approvers decision le rahe hain.	Approver: Approve / Issue / Revert / Reject
Issued	Final approved order. Permanent PO/WO number assign hua.	Download PDF, Amend, Recall, Cancel (permission se)
Rejected	Approver ne reject kar diya. Order band ho gaya.	Sirf view kar sakte ho, koi action nahi
Reverted	Approver ne wapas bheja Review ya Draft mein.	Edit karo aur dobara submit karo
Recalled	Issued order ko wapas le liya gaya (ek step peeche).	Draft mein aata hai editing ke liye
Cancelled	Order completely cancel ho gaya.	Sirf view, koi action nahi
Amended	Original order ka amended version aa gaya. Original "Amended" mark ho gaya.	Clone order (new draft) edit ho raha hai

3. Buttons — Kab Dikhte Hain & Kya Karte Hain

Draft Status Buttons

Button	Kaun Dekh Sakta Hai	Kya Hota Hai
Submit to Review	Sab users	Pehle check: Quotation doc + Proof doc mandatory. Dono hain to status → Review
Edit Order	Global Admin ya Order Creator	CreateOrder form kholti hai editing ke liye
Cancel Amendment	Admin ya Creator (sirf agar yeh amended clone hai)	Clone delete hota hai, original order wapas "Issued" ho jaata hai

Review Status Buttons

Button	Kaun Dekh Sakta Hai	Kya Hota Hai
Submit for Approval	Sab users	Approval request create hoti hai → Status: Pending Issue. Approval chain start.
Edit Order	Global Admin ya Order Creator	Editing ke liye wapas form mein

Pending Issue Status Buttons (Approver Panel)

Button	Kaun Dekh Sakta Hai	Kya Hota Hai
Approve	Current step ka Approver (approve permission)	Approval step complete → next step ya Issued
Issue	Approver (issue permission) ya Global Admin	Direct Issue → Final PO number assign → Status: Issued
Revert	Approver (revert permission)	Comment mandatory → Order wapas Review ya Draft mein
Reject	Approver (reject permission)	Comment mandatory → Status: Rejected (order band)

Issued Status Buttons

Button	Kaun Dekh Sakta Hai	Kya Hota Hai
Amend (direct)	Power User (can_recall ya can_cancel permission)	Reason + Attachment → Clone order Draft mein, original "Amended" mark
Recall	Power User (can_recall permission)	Comment mandatory → Status: Recalled
Cancel	Power User (can_cancel permission)	Comment mandatory → Status: Cancelled
Request ▾ → Amend Request	Regular User (no special perm)	Reason + Attachment → Request submit, admin se approve karwana hoga
Request ▾ → Recall Order	Regular User	Reason → Recall request submit, admin approve/reject karega
Request ▾ → Cancel Order	Regular User	Reason → Cancel request submit, admin approve/reject karega

**Cancel [Recall/Cancel]
Request**

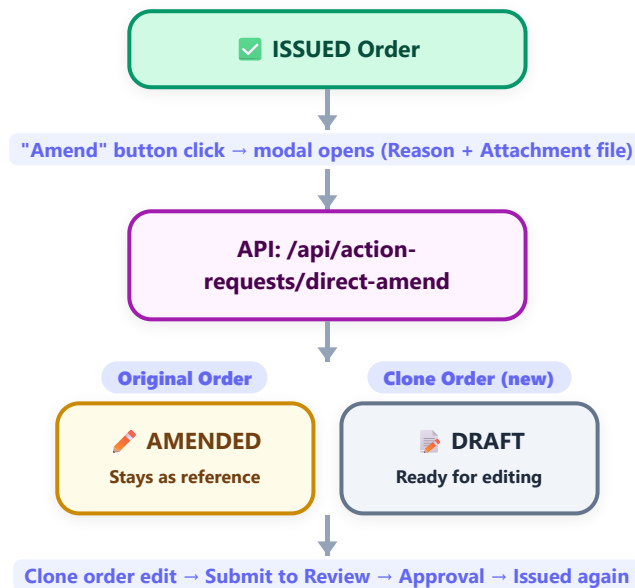

Jo user ne request kiya (pending ke
dauran)

Apni pending request wapas le lo (admin se pehle)

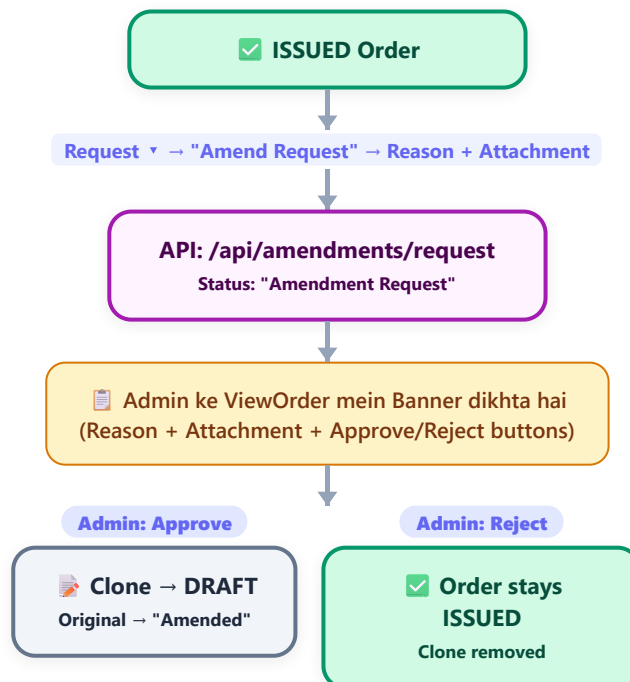

4. Amendment Flow — Detail

Amendment ka matlab: Issued order mein changes karne hain. Direct amend sirf Power Users kar sakte hain. Regular users ko request submit karni padti hai jo admin approve karta hai. Dono cases mein original order ka ek **clone (copy)** banta hai jise edit kiya jaata hai.

Power User Amendment Flow

Regular User Amendment Request Flow

Action Requests (Recall / Cancel) Flow

Regular users "Recall Order" ya "Cancel Order" request submit karte hain. Admin ke paas Approvals page ya ViewOrder mein banner dikhta hai jahan se wo approve ya reject kar sakte hain.

Action	Regular User karta hai	Admin approve kare to	Admin reject kare to
Recall Request	Reason submit → request pending	Order → RECALLED status	Order stays ISSUED, request closed
Cancel Request	Reason submit → request pending	Order → CANCELLED status	Order stays ISSUED, request closed

5. ViewOrder — Tabs Ka Kaam

Tab	Kya Dikhta Hai / Kya Kar Sakte Ho
Order Details	Company, Vendor, Site details. Items table (qty, rate, GST, discount). Grand total. Amendment banner (agar pending hai). Recall/Cancel request banner.
Approvals	Complete approval timeline — kaun approved, kaun pending, kaun reverted. Progress steps dikhte hain with timestamps.
Log	Status history — order ne kaunse kaunse stages cross kiye. Flow view ya List view toggle kar sakte ho. Frozen snapshots at each Recall/Revert.
Order Documents	Pre-documents: Quotations, Comparative Sheet, Vendor Docs. Upload / Download / View karo.
PDF View	Live PDF preview of the Purchase Order / Work Order. Download button bhi hai.
Goods Receipts	GRN (Goods Receipt Notes) records linked to this order — material receive records.
Vendor Invoices	Vendor se aaye invoices documents.
Payments	Is order ke against kiye gaye payments ke records.

6. Approvals Page — Kya Dikhta Hai

 Intake Tab - Intake requests jo approval mein hain - Approve / Reject kar sakte hain - Real-time SSE updates aate hain	 Orders Tab - Sub-tab: Issued orders dekhne ke liye - Amendment requests list - Action requests (Recall/Cancel pending) - Approve / Reject directly from list
 Payments Tab - Payment approval requests - Finance-related approvals	 Auto-Refresh - SSE (Server-Sent Events) se live updates - Backend push karta hai jab order status change ho - Reconnect automatically (5s delay) - Local cache bhi use karta hai speed ke liye

7. User Roles & Permissions

🔑 Global Admin

- Sab kuch access hai
- Kisi bhi order ko Issue / Revert / Reject kar sakta hai
- Direct Amend kar sakta hai
- Recall aur Cancel kar sakta hai
- Amendment requests approve/reject kar sakta hai
- Action requests approve/reject kar sakta hai
- Kisi bhi order ko edit kar sakta hai

✅ Power User (Approver with Special Perms)

- Approval step permissions: approve, issue, revert, reject
- `can_recall` → Issued order recall kar sakta hai
- `can_cancel` → Issued order cancel kar sakta hai
- `recall_after_issue` → Post-issue recall permission
- Direct Amend button dikhta hai (no request needed)
- `canManageAmend` → Amendment requests approve/reject

👤 Regular User (Creator)

- Order create kar sakta hai
- Apna order edit kar sakta hai (Draft/Review mein)
- Submit to Review / Submit for Approval kar sakta hai
- Issued order par "Request ▼" dropdown dikhta hai
- Amend Request / Recall Request / Cancel Request submit kar sakta hai
- Apni pending request cancel kar sakta hai

👁️ Read-Only / Other Users

- Orders dekh sakte hain
- Koi action button nahi dikhta
- PDF download, tabs browse kar sakte hain

8. Document Requirements

⚠️ **"Submit to Review" se pehle mandatory documents:**
Agar yeh documents nahi hain to order Review mein nahi jaayega — error toast dikhega.

Document Type	Category	Mandatory?
Quotation	category: 'quotations' ya quotation_url field	✅ Haan — at least 1
Comparative Sheet / Vendor Docs	category: 'comparative' ya 'vendor-docs' ya comparative_sheet_url	✅ Haan — at least 1
Amendment Attachment	Amend request ke saath	✅ Haan (Amend request mein)

9. Backend API Endpoints (Order Module)

Endpoint	Kya Karta Hai
GET /api/orders	Saare orders list karo
GET /api/orders/:id	Single order ka full detail
PUT /api/orders/:id	Order update karo (status change, edit)

GET /api/orders/:id/pdf	PDF generate karo (Puppeteer)
GET /api/orders/:id/preview	PDF preview (blob)
POST /api/orders/upload	Document file upload
GET /api/orders/events	SSE stream — live order updates
POST /api/approvals/requests	Approval request create
POST /api/approvals/action	Approve / Reject / Revert / Issue
GET /api/approvals/requests/:orderId	Order ka approval data + timeline
POST /api/amendments/request	Amendment request submit (regular user)
POST /api/amendments/action	Amendment Approve / Reject (admin)
POST /api/amendments/cancel	Amendment cancel (clone delete)
GET /api/amendments/chain/:id	Amendment history chain
POST /api/action-requests	Recall / Cancel request submit
POST /api/action-requests/direct-amend	Power user direct amend
POST /api/action-requests/:id/action	Approve / Reject action request
